

Welcome to Rainmakers Ozeania

THE ONLY SITE IN THE WHOLE WIRED WORLD WHICH PROVES IRREFUTABLY THAT: - Global warming is essentially caused by the heat we add to the globe to power our automobiles, make electricity, metals, cement..., and to stay warm in winter. - As we continue to heat the environment and kill forests, the atmosphere is becoming thicker, warmer and wetter. Cyclones will become fiercer, then self-reinforcing, until they start a sequence of events that will eliminate all of us. - All excess atmospheric CO2 can be fixed into marine biomass easily. This biomass can be used as food, fuel and fertilizer. More than enough food would be produced to feed several times the earth's present population. The fertilizer can be used to make deserts bloom and to reforest mountains. Forests absorb CO2 and solar radiation while helping to stabilize the climate. The fuel could give us all the energy we need without increasing the atmosphere's CO2 load. - The Second Law of Thermodynamics is a fraud. We can make all the useful energy (electricity, mechanical, heat) we need from ambient heat the way nature does it. WE NEVER NEEDED FOSSIL OR NUCLEAR FUELS! - Our survival as a species is threatened because our credit money economies are dishonest. It is easy to implement an honest economy which has prices but no intrinsic value money which is created at almost no cost and is spent into circulation at high face value. Such an Immediate Economy would help bring about a world without war in which all human beings unite like cells in a single living body. - We can dream practically of renewing Paradise on earth soon - and carrying its life out into the universe. - SITE MENU - Refreshing

got into our present eco-logic eco-nomic predicament Go to Refreshing Memories

Causes, Consequences, Reality Check It's more dangerous and easily remedied than most people believe. Go to
